**INNOLOG WINS Asset Inventory Services contract
for the Central Lands Highway Division (CFHD)**

(McLean, VA) – Innovative Logistics Techniques, Inc (INNOLOG) will be supporting the Central Lands Highway Division (CFHD) with Asset Inventory Services for the Federal Highway Administration (part of the Department of Transportation). The duration of the contract is eight weeks long and will take place in Lakewood, Colorado. We have sent a team of experts from our headquarters to provide the services for CFHD and will additionally hire from the local community for the inventory task.

The purpose of this Central Federal Lands Highway Division project is to improve the accuracy and reliability of their inventory and related property data. A comprehensive inventory of all government-owned assets is required to bring Central Federal Lands Highway Division (CFLHD) into compliance with current property management standards established by the Federal Highway Administration (FHWA), the U.S. Department of Transportation (USDOT), the General Accounting Office (GAO), and the Office of Management and Budget (OMB). To do this, the CFLHD Administrative Services Staff and Information Technology Staff must be able to conduct a complete inventory of all assets, audit the existing inventory records against the new physical inventory, resolve discrepancies, enter or scan the new inventory into MAXIMO Enterprise, create a MAXIMO database, and provide training on the MAXIMO inventory system to CFLHD personnel. In order to meet their goals, the CFLHD Administrative Services Staff and Information Technology Staff will require functional and analytical support augmentation from INNOLOG in the areas of inventory control, warehousing, database support, training and program management. After conducting a comprehensive inventory of their assets, CFLHD plans to implement MAXIMO as a

management tool by populating the inventory data in MAXIMO and by training personnel who will use MAXIMO as end users or administrators.

“As always, we welcome the opportunity to step up to the plate for any new customers” says Mr. Hammond. “I am thrilled and hopeful that with our initial team of Jesse Simmons, Wendy Townsend and Thaddeus Hammond, this will put us in the perfect position to continue to provide excellent services even beyond the eight week project term.”

About INNOLOG

INNOLOG is a leading integrator of logistics systems for homeland security, defense and state and local government agencies. INNOLOG provides proven logistics management processes and technology to ensure the secure end-to-end deployment of precisely the right mission critical materiel and personnel to the right location at the right time.

Customers include the U.S. Army, U.S Navy, Department of State, Transportation Security Administration, and other defense and civilian agencies in federal, state, and local government. INNOLOG’s senior management team has a diverse background in management, logistics and technology and includes several retired high-ranking Army, Navy and Coast Guard officers with a combined 150 years of military logistics management experience. INNOLOG, founded in 1989, is privately held, has several locations worldwide, and has an impressive record of performance and growth as a successful minority business enterprise. Headquartered in McLean, Virginia, INNOLOG can be found on the Web at www.INNOLOG.com.
